

# FIVE Simple Steps to Make a PYRAMID

## 1. Things you need:

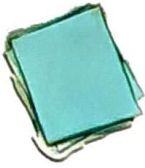

Eraser,  
Pencil,  
Sharpener

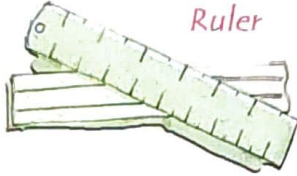

Cutter,  
Scissors

Thick sheets

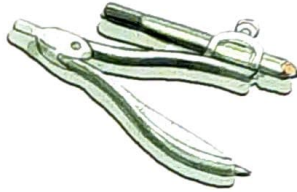

Ruler

Fevistick,  
Tape

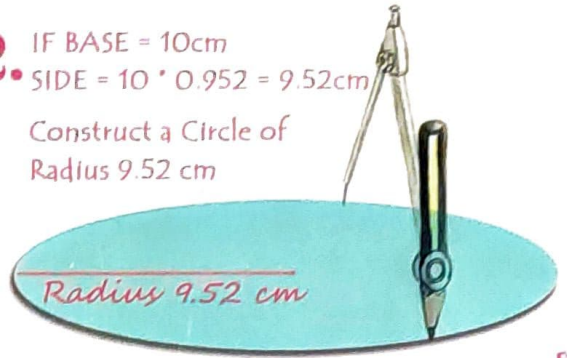

Compass

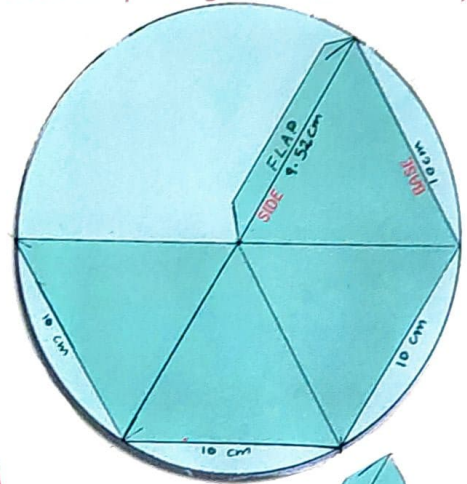

FORMULA TO REMEMBER:  $\text{SIDE} = \text{BASE} * 0.952$   
If Base = X units, Side =  $X * 0.952$  units

2. IF BASE = 10cm  
SIDE =  $10 * 0.952 = 9.52\text{cm}$

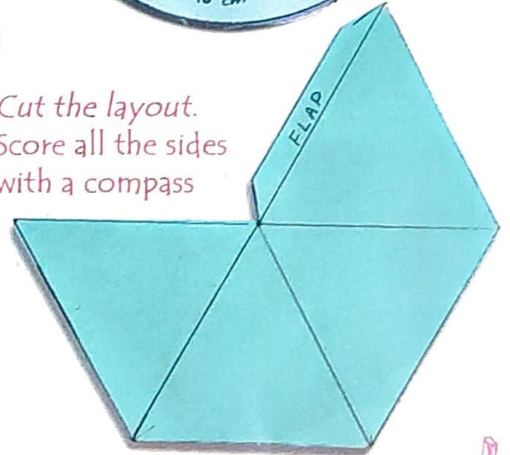

Construct a Circle of  
Radius 9.52 cm

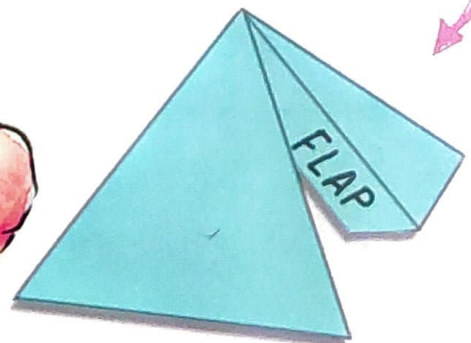

3. Cut 4 equal arcs of 10cm and join all the lines to the centre  
Draw an additional flap of any measurement for joining the sides of the Pyramid

4. Cut the layout.  
Score all the sides with a compass

5. Put glue on the flap and paste it

AND ...  
IT'S DONE!
